

Development

Project development at UBM is based on:

- careful study of the present market trends;
- study of the competitive environment;
- forecasting of the future demand;
- comparing the different investment objects;
- calculation of the necessary volume of investments and duration of the payback period.

Partnership

Depending on the specialties of the projects and partner's strategies we consider different kinds of partnership. Our priority – establishment of the long-term mutually beneficial relations.

Responsibility

UBM take responsibility for the risks concerned with implementation of the projects
